

Minority Owned SWaM Certified Small Business

Capability Statement

Technologies for a Better World

Core Competencies

Ojasys is an IT Services and advisory firm helping enterprises and professionals navigate complex technology, data, and AI-driven business decisions. Our offerings span Technology & AI Strategy, Enterprise Architecture, Consulting, Program Management, Project Staffing, and end-to-end solution delivery. Through an adaptable On-Demand Business Model, we merge deep industry expertise with cost-effective talent to drive measurable, AI-enabled transformation. Our strength lies in combining Subject Matter Expertise, disciplined program management, and quality oversight to tailor solutions to each client's needs.

Key Capabilities

- AI Consulting – AI strategy, readiness assessments, use-case discovery, ROI modeling, and responsible-AI governance.
- AI Transformation – enterprise-wide adoption of GenAI, Agentic AI, and ML to redesign processes and operating models.
- AI Solutions using traditional ML, GenAI models, Agentic AI, and AI-based algorithms.
- Enterprise Architecture & Governance.
- Data Governance, Quality & Master Data Management.
- Risk Management & Risk Analytics capabilities.
- Talent Acquisition and Management Solutions.
- Program / Project Management / PMO / EVM.
- Application Design and Development.
- Turnkey Solutions with Outsourcing Support.
- Business Intelligence: Data Lakes, Data Warehouse/Marts, Self-serve BI.
- Strategy and migration to Cloud Technologies.

Past Performance

- Designed and deployed GenAI and Agentic AI solutions, including NLP/NLU, document automation, image processing, and conversational bots for commercial applications.
- Established & managed EA Strategy, Principles, Standards & Guidelines for large & medium clients.
- Architected and delivered Enterprise Data Lake & BI layers in record time.
- Designed and developed web/mobile business applications for financial and other industries.
- Delivered end-to-end IT solutions for COTS implementation, customization, and migration support.
- Built business intelligence solutions including data collection and reporting for varied use cases.
- Defined Master Data Management and Reference Data Stores for current clients.
- Defined project, data, and conceptual/logical/physical data models with pragmatic architecture for best ROI, TCO, and time to market.

Differentiators

- Led by IT professionals with decades of experience across Finance, Energy, Retail, Transportation, and Non-profits.
- Pragmatic, win-win solutions that improve Time to Market, ROI, and TCO.
- Hands-on approach to solving critical client problems.
- Responsible, secure, and governed approach to AI adoption.
- TOGAF Certified Enterprise Architects.
